

I have been a customer of Timperley Motors for 3 years after my approaching them with a problem I had with an LPG Installation on my previous vehicle, a 3.5 V8 Range Rover. Although they did not know me, the vehicle or any history of the installation they were very professional and courteous in their approach and solved the issue I had with that car.

In 2004 I purchased a 3.8 Land Rover Discovery which I decided to have converted to LPG and obtained a price from Timperley Motors. Upon agreement of the quote the installation of all equipment needed was carried out with consummate expertise and courtesy and I was given a loan car whilst the work was being done.

Since then, all my servicing needs have been met by Timperley Motors and I have found all staff to be friendly and accommodating and would not hesitate in recommending them to any motorist.
